## CONTAMINATION SCREENING

### SELECTIVE MEDIA BEER SPOILER SCREENING

*How many samples are you sending for Selective Media Beer Spoiler Screening? (\$40 each)*

*Please Note: This method uses microbiological selective media and may take 7-10 days for results.*

### PCR BEER SPOILER SCREENING

*How many samples are you sending for PCR Beer Spoiler Screening? (\$99/sample/test)*

*This method uses PCR analysis and may take 1-2 days for results.*

**WHAT TEST/TESTS DO YOU NEED? (check all that apply)**

**HOW MANY TESTS DO YOU NEED? (type in the number)**

**S. diastaticus and Brettanomyces.....**

**Lactobacillus/Pediococcus, Hop Resistance,  
and Megasphaera/Pectinatus.....**

**TYPE IN YOUR BATCH # OR BATCH CODE .....**

Please tell us about the sample site and the suspected contamination: *400 characters max.*

HOW TO PACKAGE YOUR SAMPLE		INSTRUCTIONS FOLLOWED?	IF NO, PLEASE EXPLAIN
<b>PREVENT LEAKAGE</b>	<i>Place all items in a Ziploc bag. Wrap container lids with parafilm or electrical tape.</i>	Y   N	
<b>KEEP COLD</b>	<i>Refrigerate samples until cold</i>	Y   N	
<b>PACKAGE</b>	<i>Wrap with bagged frozen ice gel/ blue ice &amp; insulation</i>	Y   N	
<b>PAYMENT</b>	<i>Please see payment details for NEW &amp; EXISTING customers under the "Ready to Pack and Ship" section on the next page</i>	Y   N	

## SHIPPING INSTRUCTIONS ON NEXT PAGE

## HOW TO COLLECT A SAMPLE

### WASH AND DRY YOUR HANDS THOROUGHLY BEFORE BEGINNING!

- Sterilize intervening "outside" surfaces, such as valves, with 70% alcohol and flame, not sanitizer.
- Do not uncap sample vessels/swabs until immediately before sampling.
- Do not touch inside of sample vessels/swabs or their caps to any surface

SAMPLE TYPE	MINIMUM AMOUNT NEEDED
Yeast Slurry	1 ml
Unpitched Wort	1 ml
Fermenting Wort	1 ml
Unfiltered Beer	1 ml
Filtered Beer	100ml
Packaged Beer	100ml
Water	1000ml
Surface	A swab

### DRAWING A LIQUID SAMPLE?

- Open valve and establish flow for several seconds before catching in a **sterile** sample container.
- If possible, allow sample to flow or crumble directly into sample vessel without using utensils.
- Do not allow sample to overflow onto outside of sample vessel; immediately recap tightly.

### DRAWING A SWAB SAMPLE?

- Firmly swab area to be tested, twisting swab to expose entire tip to area in question.
- Immediately place exposed swab back into sterile packaging and seal.
- Label each sample specifically (sample name, site, batch number, etc.).

### SENDING A MICROBE FOR IDENTIFICATION?

- Flame an inoculating loop and select a single colony which represents the population.
- Transfer this colony to a fresh plate of media and streak across the surface.
- Label, wrap with parafilm and ship

### READY TO PACK AND SHIP?

- Place all items in a Ziploc bag to prevent leakage. Don't use whirl pack bags or non-sealing urinalysis cups.
- Refrigerate samples until cold, then wrap with **frozen ice gel/blue ice** and insulation just before shipping.
- Include any relevant notes in your package.
- Leaking samples will NOT be tested.
- Cost is \$40/sample/test for Selective Media screening and \$99/sample/test for PCR screening.
- **NEW CUSTOMERS** - Enclose a check or call 719-482-4895 Ext 7 to pay with a credit card.
- **EXISTING CUSTOMERS** – You may enclose a check, or we will bill your account on file.

### SHIP VIA **NEXT DAY SERVICE TO:**

The Brewing Science Institute - 106 Glen Dale Drive - Woodland Park, CO 80863

**IMPORTANT: (Allow carrier to drop package WITHOUT a delivery signature)**

**IMPORTANT: If possible, ship only on Monday's - Wednesday's**

**Questions? Call 719•640•4440**
